Dear Parents/Guardians of the Heuvelton CSD:

In early September the New York State Legislature passed legislation with specific requirements surrounding lead testing in school drinking water.

Our district with the assistance of the Jefferson-Lewis BOCES Health and Safety Office took samples from drinking water sources such as water bubblers, drinking fountains, and sinks typically used for water consumption. Additionally, such locations as custodial closet slop sinks, bathroom sinks, and other locations that are not typically used as sources of drinking water were also tested.

Out of the seventy-seven (77) locations tested we had five (5) above the 15 parts per billion standard. None of the five identified involved drinking water sources. We have taken appropriate remediation steps to replace those fixtures with new faucets that are certified lead free.

If you have any questions or concerns, please feel free to contact my office. You may view the results of all of the testing on the district website at: <http://www.heuvelton.schoolfusion.us/>

Thank you.

Sincerely,

Susan E. Todd, Superintendent
